

## MOTHER OF SCHOOL GIRL

**Tells How Lydia E. Pinkham's Vegetable Compound Restored Her Daughter's Health.**

Plover, Iowa.—"From a small child my 13 year old daughter had female weakness. I spoke to three doctors about it and they did not help her any. Lydia E. Pinkham's Vegetable Compound had been of great benefit to me, so I decided to have her give it a trial. She has taken five bottles of the Vegetable Compound according to directions on the bottle and she is cured of this trouble. She was all run down when she started taking the Compound and her periods did not come right. She was so poorly and weak that I often had to help her dress herself, but now she is regular and is growing strong and healthy."—Mrs. MARTIN HELVIG, Plover, Iowa.

Hundreds of such letters expressing gratitude for the good Lydia E. Pinkham's Vegetable Compound has accomplished are constantly being received, proving the reliability of this grand old remedy.

If you are ill do not drag along and continue to suffer day in and day out but at once take Lydia E. Pinkham's Vegetable Compound, a woman's remedy for woman's ills.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

## WHERE THEY WILL ATTEND

(Continued From First Page.)

and Florine Rives will attend Randolph-Macon College, at Lynchburg, Virginia. Misses Lysbeth Pendleton and Annie Barker will go to Agnes Scott at Atlanta, Ga.

Whit Radford, of the county, Herndon Waller, Calvin Thompson and Miss Helen Thompson will all be in their second year at Georgetown College, at Georgetown, Ky. Will Cate will be a sophomore at Kentucky Wesleyan College, at Winchester, Ky. John Wood, of Edgerton, will go to Kentucky Military Institute. Joe Clark Baker also expects to enter Vanderbilt. Randolph Dade, of the county, will be in the Medical School at Vanderbilt.

McDowell Trabue, of near Pembroke, and Frank Stites will study medicine in the medical department of the University of Louisville. Jack Tandy will enter the University of Pennsylvania at Philadelphia. Philip Haynes, of the county, will be at the University of Michigan.

Thomas Roberts, of Gracey, will be in the sophomore class at the University of the South at Sewanee, Tenn. Bruce Woodruff will go to Washington & Lee University again this year. Henry Eager will be at Michigan University at Ann Arbor, Mich.

Misses Evelyn Smith, Mary Hayes of Fairview, will go to State this year and finish his last year there in agriculture. Logan Green, Ernest Pursley, William Warfield and W. T. Radford and Misses Alice Merritt and Lillian Gaines, also expect to

again attend that Institute. William Jesup will enter the class in agriculture there this year and Lee Trabue, Will Lowry and Everett Penick will also enter there. Henry Abbott will again go to the University of Virginia. Macon Abbott will enter the freshman class there this year. Lakin Duckert intends to also be again enrolled at the University of Virginia, where he will study law.

Chas. Robertson will begin his second year in the medical department at Vanderbilt University. George Cate will also be in that department, at Lyndon, Ky.

Miss Lucile Van Cleve is going to Hamilton College, at Lexington. Miss Elizabeth Lackey and Miss Alice Jameson, of Pembroke, are going to enter Sayre College, at Lexington. Miss Emelia Frankel will again go to LaSalle College, in Maryland. Misses Ina Gore and Mattie Johnson will attend Hamilton College, at Lexington. Miss Mary Elizabeth Lacy will spend her second year at Science Hill College, at Shelbyville, Ky.

F. B. and English Lacy will go to Bellbuckle College, in Tennessee. Bentley Major will again go to Bethel College, at Russellville. Charles Bassett will enter St. Mary's College, near Louisville. Ned Garrett will go to Bethel College, at Russellville. James Coleman and Frank Summers, of the Gracey neighborhood, both are going to Vanderbilt Training School, at Elkton, Ky. Rudolph Morris will be at Bethel College, at Russellville, Ky.

Miss Virginia Hale will go to Ward-Belmont College, in Nashville. Miss Annie Leavell expects to attend Buford College, in Nashville. Miss Katherine Garrett will go to Sayre, at Lexington. Miss Sarah Bell Wharton will attend Bethel College here. Miss Frances Carter, of the Pembroke neighborhood, will be back again at Bethel Female College. Miss Bertha Clardy, of near Howell, will be back at Bethel this year. Misses Cordelia Cross, Birdie Nickols and Jessie Rector, who were at Bethel last year, all expect to be back. Misses Eulah Martin and Mary Tandy, two girls from the county, will enter college at Bethel. Misses R. E. Coleman and Crit McKnight, of the vicinity of Howell, will take music and elocution at Bethel. Misses Nora Golladay, Cinderella Armstrong and Fannie Rice, of this city, will be day pupils at Bethel.

Robert Dabney has obtained one of the fellowships offered by the Fleischman Yeast Co., for research work in bacteriological chemistry, and is working for a master's degree in industrial chemistry. He is located at the Agricultural Experiment station, at Lexington.

Warren Sights, who is a graduate of Chicago University, will study at the Rush Medical College, at Chicago. Mr. Sights will finish his last year at Rush this year. He is working toward an M. D. degree.

Robert Cooper is pursuing his studies in violin at the Conservatory of Music in Cincinnati, Ohio. Mr. Cooper has been already at the Cincinnati Conservatory for several months.

## DR. BEAZLEY

**Specialist**

(Eye, Ear, Nose and Throat.)

## TRUE FACTS ABOUT POOL

(Continued from First Page.)

was going on in Christian County in a more marked degree than in any other county in the State.

You make the statement that the same fertilizer manufactured in Tennessee mines and for which the farmers will have to pay \$5.70 per ton, is sold in Baltimore at \$8.75. This being the case the farmers feel that you should lend them every assistance in their righteous fight to get this price reduced.

You state that "the farmers do not seem to be very enthusiastic over the Pool." The farmers have asked me to state that they were never more enthusiastic over anything in their lives, and that they are determined to keep up the fight until they can buy Acid Phosphate at the same price at which farmers in other States are buying it. We feel that you were grossly misled when you wrote the article and that you probably got your information from some friend of the fertilizer manufacturers, but we feel sure that we can count, hereafter, on your hearty cooperation, now that you know the whole truth about the Fertilizer Pool.

Yours very truly,  
Geoffrey Morgan,  
Farm Demonstrator.

## In Society

### Dance Tuesday Night.

Tuesday night at the Hotel Latham the young men of the city will give a dance. The music will be furnished by Bickmore and Simpson. Mr. William Warfield will give demonstrations of the modern dances. The dance will be given in honor of the out of town guests.

### Lawn Fete.

Miss Louise Brethitt entertained at a lawn fete last evening at her home on South Virginia Street. The yard was artistically hung with Japanese lanterns. Progressive conversation was the mode of entertainment. Delicious ice refreshments were served.

### Rex Party.

Mrs. Lawrence Alexander entertained at a Rex party Wednesday afternoon for little Miss Belle Alexander. About twelve little folks were in the party.

### Camping Party.

Messrs. Jim Moss, Manning Brown and William Tandy are camping this week at Huffman's mill. The boys walked out to the mill and will a "foot it" coming back. They expect to return this afternoon.

## THE MYSTERY OF THE WEATHER.

By Garrett P. Serviss.

"Will man ever be able to control the weather?" Not as long as it remains a mystery to him, and a mystery it still is in spite of all the studies and all the experience of the weather bureaus and the prognosticators.

When Eve took Adam's arm and walked with him out of the Garden of Eden's gate, she first learned what damp weather means for a woman's frizzes, while Adam was probably not long in feeling the first twinges of rheumatism. The conclusion that a persistent spell of rainy and gloomy weather followed the Great Explosion is as warranted as many others that have been drawn by learned men, because that would be a logical means of causing the offending pair to appreciate what they had lost.

If you ask a professional meteorologist why the North Atlantic seaboard has been so persistently afflicted with clouds, rain, mugginess, excessive humidity and general atmosphere gloom this summer, he will very likely look you defiantly in the eyes and assert that you are suffering under an illusion; that the weather is all right and running its regular gait, and that you have forgotten what happened last year. Then he will discourse to you on the law of averages, and prove mathematically that, in the long run, the seasons don't vary.

All this is really a confusion of ignorance. Meteorology, at present, is a science of averages and generalities. It has to deal with a subject whose elements are so shifty that nobody can sure'y foresee their varying combinations.

To foretell a change of weather is like foretelling the shape that a puff of smoke will take; and to account for a spell of good or bad weather is as difficult as to account for the birth and persistence of a cloud that hangs for hours in a blue sky. The general causes are known, or believed to be known, but science, to have much practical value, must master the details.

I do not mean to cast doubt upon the general usefulness of weather bureau work, but there should be no mistake concerning the bases on which it rests. When weather predictions succeed, it is because the atmosphere has settled into a state of regular action and reaction between the forces that control its phenomena, and then the weather observers can follow the course of a storm and predict its arrival at particular points as easily as a train dispatcher can trace the run of an express across the continent by simply consulting his time table.

But when the powers of the air concert a change of schedule, the

## Liquor Men Wanted To "Inspire."

(Louisville Evening Post.)

THE POST'S ANSWER.

Look not upon the wine when it is red,  
When it giveth its colour in the cup,  
When it goeth down smoothly,  
At the last it biteth like a serpent,  
And stingeth like an adder.

(Prov. 23: 31-32.)

Frankness begets frankness. The Evening Post responds in an equally truthful and open way.

Newspaper editors are busy, but they are busy studying such questions as that presented by the National Wholesale Liquor Dealers' Association. They are not too busy to give to such subjects the investigation requisite to a proper comprehension of the issues involved. They prefer, as a rule, to conduct these investigations themselves, and if they are worthy of the position they occupy they are not willing to have this work done for them by either side to any of the great controversies, whether it be prohibition, protection, conservation, regulation of corporations, control of municipal utilities or local taxation.

If they have not the opportunity for the study of this and other questions, they should abandon the pretense of discussing them, and not rely upon either the information or "editorial articles" furnished free of cost to them by interested parties.

The Evening Post believes there is a way to deal with this and other questions, but we have not found that way presented in any of the free copy furnished us by the various associations organized for the protection of the liquor interests at the cost of public welfare.

Moreover, we regret to see a resistance at every point from these organized interests against the mildest of reasonable regulation. They resisted the Sunday-closing act in Louisville until it was an accomplished fact. They resisted the increase in the license to \$500 as long as opposition availed for postponement. They resisted the county unit bill in the last legislature, though it affected only a small portion of the business, and though both political parties were pledged to its support. They are in open rebellion against the law in Savannah. They are secretly resisting the law in Tennessee. They flagrantly violate the law in Chicago, New York and Kansas City. As soon as they capture a city government they wink at any violation of the statutes.

The cure for these evils must be found by the citizens themselves. The influence of the organized liquor associations over public opinion grows less year by year, and will continue to decrease as long as the attitude is one of resistance where resistance can be effective and collusion with the city authorities for the nullification of the statutes of the states when they have the power to nullify.

After due consideration the Evening Post prefers to investigate these matters on its own account. It is the attorney of the people, striving to protect the common interests against the demand of the organized privileged classes.

scientific meteorologist is, for a time, as uncertain and upset in his calculations as the popular weather prophet, and less to be depended upon for local predictions than some wise old farmer who studies the behavior of tree frogs, earth worms, hens and chickens, and other animals which seem to have a foreknowledge of nature's moods that is denied to us.

Meteorology can tell, from observations gathered widely on land and sea, what the general state of the atmosphere is during a long spell of wet or dry weather. It can also make (very general) predictions concerning changes likely to occur in these general states of the atmosphere, but it refuses to be held to strict account in such things. If you use an intellectual microscope you will find in its schedule what is common on railway time tables: "Subject to change without notice!"

It is no wonder, then, that thousands of people have more faith in St. Swithin's day than in the weather bureau. Last Wednesday was St. Swithin's day, and the old saw says: "St. Swithin's day, if thou dost rain, For forty days it will remain. St. Swithin's day, if thou be fair, For forty days 'twill rain na mair."

This Scotch-English weather saint has his compeers in other countries. In France it is St. Medard, the state of whose day is supposed to

the summer weather for forty days after. All over the world there are similar superstitions, which are superstitious only in their form, for there can be no doubt that they are based on the results of long-continued expeiate. If they of weather prevailing about the time of the occurrence of these days really does, upon the whole, continue for several weeks, it must be because a general law is in operation tending to produce a stagnation in the state of the atmosphere.

St. Swithin's day occurs between three and four weeks after the summer solstice, and it is well known that, by that time, the character of the season has become settled, and is not liable to be much changed until the sun has sunk so far toward the autumnal equinox that the heat received becomes so much less than that radiated at night, that a general atmosphere must necessarily occur.

We need a meteorological Newton; but if we had one is it certain that we should be any happier? Newton established the law of gravitation, but now there is much dissatisfaction because we don't know what gravitation is; Newton could only tell us what it does.

Regularly.

Miss Paul—"Did they allow her to bury her past?" Miss Fry—"Yes, at the funeral."
